Treat Your Winter Blues at the Derma Spa!

By Ann Marie Ebling, M.S., N.P.

It is the perfect time of year to treat yourself, the holidays are over and it is cold outside. Choose a facial or body treatment that will bring some warmth and sunshine to you!

Aromatherapy Salt Glow: Remove dead skin cells and polish your skin to a beautiful glow with natural sea salts. This treatment will exfoliate and moisturize, leaving your body smooth, soft, and glowing.

Hot Stone Massage: Warm up on a cold winter day with a hot stone massage. The hot stones will relax and balance the body. Combined with all the benefits of a therapeutic massage, warm stones are placed in the chakra centers of the body. The warmth and weight balances the mind, releasing tension and improving circulation.

Spa Facial: Give your skin a refresher with our signature spa facial. A fruit enzyme peel exfoliates dead skin cells and surface debris. A mask customized for your skin type will be applied to revitalize your appearance. A rich moisturizer completes this relaxing and beneficial facial.

Hot Oil Manicure: Hands are soaked in warm oil to hydrate skin and cuticles. Follow with shaping of the nails and massage. Finish with a perfect polish if desired.

Dermasweep Microdermabrasion: This medical grade multi-level skin resurfacing system integrates skin specific solutions to improve a number of skin conditions including sun damage, acne, surgical scars, and fine lines.

Laser Hair Removal: Get ready for that spring vacation, our medically trained hair removal technicians will choose the best laser removal device for your hair color and skin type.
